

GEOPAVE®

PERMEABLE PARKING LOT MEETS STORMWATER GOALS
THE CITADEL—CHARLESTON, SOUTH CAROLINA

PROJECT LOCATION

Charleston, South Carolina

PROJECT APPLICATION

Gravel Parking Lot

ENGINEERING TEAM

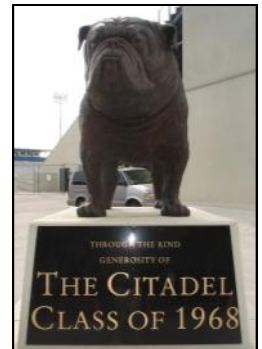

HLA, Landscape Pavers-Charleston, SC

CONTRACTOR

Landscape Pavers

MATERIAL SUPPLIER

ACF Environmental

PROJECT SUMMARY

The GEOPAVE® Porous Pavement System provides a green alternative to traditional asphalt parking. The GEOPAVE project at the Citadel was installed for alumni parking and totaled 20,500 sq ft of 117 parking stalls, utilizing 4,090 GEOPAVE units. The stabilized aggregate surface reduces stormwater runoff, performs as a stormwater retention “basin” and provides a cooler surface than hard surface pavements.
