

GR8-PROTECTOR

Temporary Grate Inlet Protector

- Prevents sediment from entering inlets!
- Safe to drive over!
- Easy and safe to install—No need to remove the grate!
- Built in Overflow-Will NOT impede the flow of the inlet!
- Resists clogging!
- High Flow Rate!
- Inert to biological degradation!
- UV Resistant!
- Reusable!

The **GR8-PROTECTOR** Temporary Grate Inlet Protector is an effective BMP for construction sites to achieve NPDES compliance. GR8-Protectors and patented fasteners are lightweight and portable for ease of installation and yet **TOUGH** enough to stay in place!

The **GR8-PROTECTOR** is manufactured from heavy geotextile fabric over a carbon steel substrate. The patented **GR8-PROTECTOR** is different from other grate filters because it is installed on the *surface* of the grate, thereby saving time while reducing installation cost and risk of injury. The **GR8-PROTECTOR** filters both sediment and trash. It is easy to clean ~ no need to remove the grate! The **GR8-PROTECTOR** is also available with optional absorption booms to capture oils. The 40-sieve size uniform openings resist clogging and will not impede the flow of the inlet.

GR8-PROTECTOR

Temporary Grate Inlet Protector

STOP wasting time and
risking injury from moving
heavy grates!

***Achieve NPDES
compliance for your
construction sites!***

***Stackable—Easy to store
and transport!***
