Ms. Bambi Sylvest  
Industrial Fabrics, Inc.  
510 O'Neal Lane. .  
Baton Rouge, LA 70819

Dear Ms. Sylvest:

During the course of the Sales Tax Street/Road Rehabilitation Program, we have tried a number of products in an attempt to eliminate or retard the formation of reflective cracks in asphaltic concrete surfaces. No product has successfully retarded the formation of reflective cracks except "Glasgrid" from Rayex, which has retarded the formation of cracks by a number of years, although it has not completely eliminated the formation of cracks.

We have been pleased and satisfied with the performance of the Glasgrid used in our program.

Sincerely,

R. K. Banks  
Assistant Program Manager
