

## OIL-WATER SEPARATOR

### CUSTOM OIL WATER SEPARATOR – TRENCH FORMER®

Some separation requirements extend beyond the capabilities of the standard Trench Former Oil Water Separator. We can provide a number of options to accommodate specific needs. The following modifications and accessories are available:

- 25 mil reinforced geomembrane containment barrier
- Special capacities and dimensions
- Internal oil storage
- Multiple and diffuser baffles
- Second liner allowing for additional leak detection

### EASY INSTALLATION – TRENCH FORMER®

**The Oil Water Separator**, by ABT

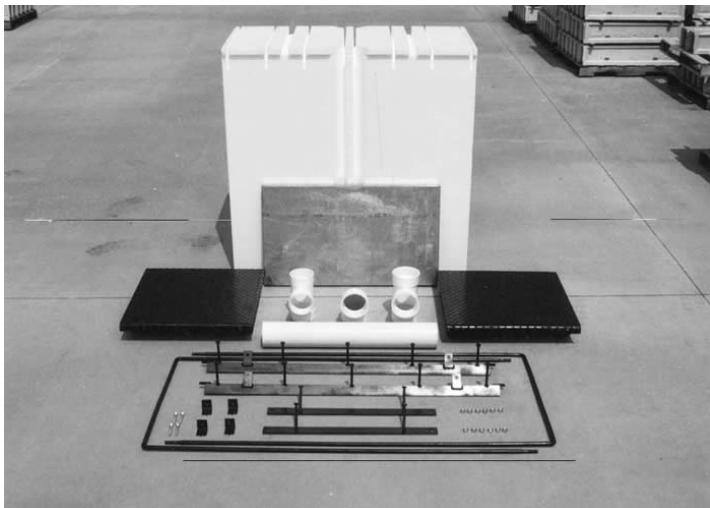

Inc., unlike other separators, is a light-weight, easily installed forming system. Using our patented, non-floating formwork, the Oil Water Separator installs without the necessity of heavy equipment. It provides a cost-effective system of unequaled efficiency.
